

Initiatives	<p>Randstad:</p> <p>Engagement statement: Realizing that the world's natural resources are limited and fragile, Randstad considers environmental protection to be consistent with its overall goals and values and an important consideration in its total activities. This policy concerning environmental protection addresses aspects of Randstad's operations which can potentially impact the environment. Furthermore "in 2021, Randstad pledged support to the UN's Net Zero initiative, which aims to reduce global emissions by 45% by 2030 and deliver a healthier, fairer environment for all."</p> <p>We also designed an action plan with the aim of reducing emissions by over 50% across scope 1 & 2 and over 30% in scope 3 by 2030, all relative to 2019 levels. Our ambition is to work towards Net Zero by 2050. Our CO2 footprint can be found in our Annual Report. Our Scope 2 (indirect emissions) via the market-based approach and location-based approach can be found here.</p> <p>Our goal is to have a set of management tools, business principles, policies, and a governance structure in place that are in line with, or exceed, the standards set for our industry, and that enable accountability for all elements of our sustainability framework, including on environment.</p> <p>Methodology: For the purposes of this assessment, in order to evaluate whether these organizations are aligned with helping achieve a net-zero future, we reviewed and assessed a number of factors:</p> <ul style="list-style-type: none"> • Their publicly stated policy positions to determine if they had acknowledged the risks of climate change and expressed support for the goals of the Paris Agreement, if they were silent on the topic, or if they failed to engage constructively in the development of climate policy. • Their principles and policy positions for public support to incentivize emission reductions. • Their advocacy actions on specific climate policy proposals, as well as internal discussions and deliberations amongst their membership on current and prospective policy positions. <p>Misalignments:</p> <ul style="list-style-type: none"> • Identified specific areas of partial/misalignment • Constructively engaging with each organization to fully understand the basis and rationale for area(s) of misalignment, with a view to enhancing alignment. • Working on ensuring Randstad's position is understood by the organization if/when misaligned positions are adopted. • Maintaining active engagement to identify aligned advocacy and policy development opportunities.

	criteria for inclusion	summary of assessment findings	
	<p>For that reason we have assessed the three main industry and trade associations (IOE, Businessseurope and WEC) of which Randstad is a member on the availability of their climate policies and whether or not they are aligned with Randstad net-zero ambition.</p> <p>Our assessment found that 66% of these organizations have a position on climate in relation to business and human rights and are therefore proactively and potentially influential on this debate.</p> <p>It is our expectation that each of these organizations are constructive participants in the discussion and development of climate policy, and are helping society to achieve a net-zero future.</p> <p>By participating in the respecting working committees/groups, Randstad will continue to proactively contribute to and influence the development of these policies ensuring alignment with our Randstad Policy for the good of our society and climate becoming net-zero in the future.</p>	<p>Of the 3 organizations assessed (IOE, Businessseurope and WEC) we found 2 organizations are partially aligned with policies that will help society achieve its ambition for a net-zero future and one with no policy. Below you will find a summary of the assessment results:</p>	
		partially aligned	no policy available
		<p><i>International Organization of Employers:</i> In November 2021, the IOE launched its Position Paper on Climate Change and the Human Rights Implications for Business.</p> <p><i>Businessseurope:</i> On November 3, 2022, Businessseurope issued its Position Paper on its expectations for COP27.</p>	<p>World Employment Confederation: Being the voice of the global and Europe employment and recruitment industry which is a people business, the Member's impact on the environment is much less than that of other sectors. Almost all of our Member's business is conducted in local markets with many locations close to both clients and talent, greatly reducing travel and CO2. emissions.</p>
